Prepare children for KS2 National Curriculum Tests with confidence using SATs-style questions. Written in line with new testing requirements, the practice questions give children realistic test preparation. SATs-style questions arranged by topic area give children targeted and focused practice ahead of the KS2 National

Curriculum Tests. \* Prepares children for the SATs Maths Arithmetic test (paper 1)  
\* Covers all the content and skills that children could be tested on \* Contains regular progress tests to check understanding \* Includes answers and mark scheme \* Can be used alongside Collins KS2 SATs Revision and Practice KS2 English: Grammar, Punctuation and Spelling Study Book A question book for children who are looking to achieve a Level 4 in KS2 Maths. It contains practice questions on various topics that they'll need to learn, with plenty of fun along the way. Prepare with confidence for the end of year SATs tests with Scholastic National Curriculum Tests. Scholastic's practice tests are fully in line with the Year 2 and Year 6 SATs Tests Each book contains two complete practice tests and a guidance and mark scheme. These practice tests have a similar look to the real test, to help familiarise children with both the content and format of these tests. The guidance and mark scheme provides advice for parents and carers on how to use the tests and how to support children in preparing for them. [Content previously published as separate test papers in packsof the same name] Applying strategic theory to outer space and drawing out the implications for international relationsOffers a definitive and original vision of space warfare that theorises often-overlooked aspects of contemporary space activities based in the discipline of Strategic Studies. This original research draws out the implications of spacepower for wider debate in grand strategy and IR.Applies the theory in a topical and contentious area within contemporary grand strategy - anti-access and area-denial warfare in the Taiwan Strait between China and America.Key principles are summarised in seven propositions to make the key take-aways of theory applicable and memorable for researchers and practitioners.This book presents a theory of spacepower and considers the implications of space technology on strategy and international relations. The spectre of space warfare stalks the major powers as outer space increasingly defines geopolitical and military competition. As satellites have become essential for modern warfare, strategists are asking whether the next major war will begin or be decided in outer space. Only strategic theory can explore the decisiveness and effects of war in space upon `grand strategy' and international relations. The author applies the wisdom of military strategy to outer space, and presents a compelling new vision of Earth orbit as a coastline, rather than an open ocean or an extension of airspace as many have assumed. Rooted in the classical military works of Clausewitz, Mahan, and Castex to name a few, this book presents comprehensive principles for strategic thought about space that explain the pervasive and inescapable influence of spacepower on strategy and the changing military balance of the 21st century. Prepare with confidence for the end of year SATs tests with Scholastic National Curriculum Tests. Scholastic's practice tests are fully in line with the Year 2 and Year 6 SATs Tests Each book contains two complete practice tests and a guidance and mark scheme. These practice tests have a similar look to the real test, to help familiarise children with both the content and format of these tests. The guidance and mark scheme provides advice for parents and carers on how to use the tests and how to support children in preparing for them.
