Approximately two years ago, the Guido Carli Association charged a group of distinguished economists with studying various aspects of the international monetary system and proposing ways to improve it. The studies were presented at a conference in Florence, Italy, on June 19, 1998 and their edited versions are published in this volume. Ideas for the Future of the International Monetary System consists of two parts: Part I contains the studies commissioned by the Carli Association - those by Dominick Salvatore; Koichi Hamada; Forrest Capie; Michele Fratianni, Andreas Hauskrecht and Aurelio Maccario; Jrgen von Hagen and Ingo Fender, Michael Artis, Marion Kohler and Jacques Mlitz; Barry Eichengreen; Michele Fratianni and Andreas Hauskrecht; Paolo Savona and Aurelio Maccario; and Elvio Dal Bosco - and the comments by Paul De Grauwe and William Branson, and the editors' conclusions. Part II contains three papers presented at the Florence conference, by Antonio Fazio, Carl Scognamiglio, and Alberto Predieri. Two legendary photographers meditate on death, memory and ritual The latest collaboration between these two seminal photographers, Leben und Tod is the culmination of their joint exhibition at artspace AM, Tokyo, in 2019. This intensely personal project concentrates on Juergen Teller's (born 1964) series Leben und Tod (Life and Death), which reflects upon the death of his uncle and stepfather Artur, juxtaposing photographs of his mother and homeland in Bubenreuth, Bavaria, with symbolic images of fertility and life on holiday in Bhutan with his partner Dovile Drizyte. Inspired by this series, Nobuyoshi Araki (born 1940) asked to photograph Teller's "childhood memory objects," items of particular emotional significance to him and his parents. Teller eagerly collected such personal gems, among them toys, a porcelain figurine and bridges made in the family's violin workshop; the resulting images by Araki are haunting yet playful, creating an intriguing narrative alongside the original story. Comprehensive descriptions and taxonomic discussions are given for each species with digital images of main identification characters and generic, subgeneric and species identification keys in English, Spanish and Portuguese. Brief world and Neotropical overviews of the biology, medical importance and control of species are provided with full coverage for those found in Brazil.
