Dissertatio inauguralis phytotomica, etc Die Kirche und Schule in Nord-Amerika. ... Uebersichtlich beschrieben Contributions to Education

In the present volume, the focus is on natural philosophy, apart from the study of living things. Topics covered include the principles of scientific enquiry, place, time, motion, the heavens, the sublunary world, meteorology and the study of materials. First ever edition of the Latin translation of Ptolemy's masterwork This is the first edition ever of Moerbeke's Latin translation of Ptolemy's celebrated astrological handbook, known under the title Tetrabiblos or Quadripartitum (opus). Ptolemy's treatise (composed after 141 AD) offers a systematic overview of astrological science and had, together with his Almagest, an enormous influence up until the 17th century. In the Latin Middle Ages the work was mostly known through translations from the Arabic. William of Moerbeke's translation was made directly from the Greek and it is a major scholarly achievement manifesting not only Moerbeke's genius as a translator, but also as a scientist. The edition is accompanied by extensive Greek-Latin indices, which give evidence of Moerbeke's astonishing enrichment of the Latin vocabulary, which he needed both to translate the technical scientific vocabulary and to cope with the many new terms Ptolemy created. The introduction examines Moerbeke's translation method and situates the Latin translation within the tradition of the Greek text. This edition makes possible a better assessment of the great medieval translator and also contributes to a better understanding of the Greek text of Ptolemy's masterwork. This work traces the etymologies of the entries to their earliest sources, shows their kinship to both Spanish and English, and organizes them into families of words in an Appendix of Indo-European roots. Entries are based on those of the Diccionario de la lengua española de la Real Academia Española. Solar energy possesses enormous potential as a source of affordable and inexhaustible energy. Solar energy is utilized with the help of various technologies and, in particular, photovoltaic technology, based on photovoltaic elements which provide direct conversion of solar energy into electricity. The compilation "Research and Development of Solar Cells" covers papers concerning various aspects of the design, research and manufacture of photovoltaic cells, as they have been selected from the library of Trans Tech Publications Inc. from 2010 to 2014 inclusive. All materials are presented in five chapters: Chapter 1: Silicon Based Solar Cells Chapter 2: Dye-Sensitized Cells Chapter 3: Other Types of Solar Cells Chapter 4: Technology of Quantum Dots Chapter 5: Engineering Support in Manufacturing of Solar Cells, which display a wide variety of challenges and achievements in the field of photovoltaic cells engineering. Contributors: Markus Barth Ford Lewis Battles John Bright Walter J. Burghardt, S.J. William R. Farmer Roland Mushat Frye Donald E. Gowan Dikran Y. Hadidian J. Rowe Hinsey W. F. Hobbie A. M. Hunter Halbert M. Jones James L. Mays Roland E. Murphy O. Carm Robert S. Paul Bo Reicke Dietrich Ritschl Culbert G. Rutenber Eduard Schweizer Richard Stauffer Wilhelm Vischer James A. Walther H. Eberhard von Waldow As part of Project Theophrastus this volume covers the material related to Theophrastus' work on logic. As Aristotle's pupil, he largely followed his master, but made important changes in modal logic, and some of his innovations passed into medieval logic. Lausberg's "Handbook of Literary Rhetoric" is an internationally acclaimed, standard reference work on rhetorical techniques in classical literature, ancient and modern. This translation makes it available for the first time to the English-speaking world.
