The Rise of Ethnic Politics in Nepal Jan 28 2020 The relationship between ethnic politics and democracy presents a paradox for scholars and policy makers: ethnic politics frequently emerge in new democracies, and yet are often presumed to threaten these new democracies. As ethnic politics is becoming increasingly central to Nepali politics, this book argues it has the potential to strengthen rather than destabilize democracy. Drawing on years of ethnographic fieldwork, Susan Hangen focuses on the ethnic political party Mongol National Organization (MNO), which consists of multiple ethnic groups and has been mobilizing support in rural east Nepal. By investigating the party's discourse and its struggles to gain support and operate within a village government, the book provides a window onto the processes of democratization in rural Nepal in the 1990s. This work presents a more nuanced understanding of how ethnic parties operate on the ground, arguing that ethnic parties overlap considerably with social movements, and that the boundary between parties and movements should be reconceptualised. The analysis demonstrates that ethnic parties are not antithetical to democracy and that democratization can proceed in diverse and unexpected ways. Providing an in-depth discussion of the indigenous nationalities movement, one of Nepal's most significant social movements, this work will be of great interest to scholars and students of Asian Politics, South Asian Studies, and Political Anthropology.

Special Edition Using Mac OS X, V10.3 Panther May 02 2020 The Panther release of Mac OS X continues the development of the Macintosh operating system. Mac OS X has become the dominant OS on the Macintosh platform and is currently the default OS on all new Macintosh computers. Mac OS X is a complex and powerful operating system for which no documentation is provided by Apple outside of the Apple Help system, which contains very limited information. *Special Edition Using Mac OS X Panther* provides the in-depth, wide ranging coverage that enables Mac users to get the most out of the operating system and included tools. This book explains how to get the most out of the core OS, including the Finder, desktop, and system customization. The book also shows readers how to use OS X's Internet applications for email, Web surfing, and .mac for publishing content on the Net. One of the book's major strengths is the extensive coverage of iTunes, iPhoto, iDVD, and iMovie. QuickTime and QuickTime Pro are also covered. The book helps readers understand and configure the technologies to expand their systems.

ECSCW 2013: Proceedings of the 13th European Conference on Computer Supported Cooperative Work, 21-25 September 2013, Paphos, Cyprus Oct 19 2021 This volume presents the proceedings of ECSCW 2013, the 13th European Conference on Computer Supported Cooperative Work. Each conference offers an occasion to critically review our research field, which has been multidisciplinary and committed to high scientific standards, both theoretical and methodological, from its beginning. The papers this year focus on work and the enterprise as well as on the challenges of involving citizens, patients, etc. into collaborative settings. The papers embrace new theories, and discuss known ones. They contribute to the discussions on the blurring boundaries between home and work and on the ways we think about and study work. They introduce recent and emergent technologies, and study known social and collaborative technologies. With contributions from all over the world, the papers in interesting ways help focus on the European perspective in our community. The 15

papers selected for this conference deal with and reflect the lively debate currently ongoing in our field of research.

ECSCW 2003 Mar 12 2021 th This volume gathers together the technical papers presented at the 8 European Conference on Computer Supported Cooperative Work (ECSCW), held in Helsinki Finland. ECSCW is an international forum for multidisciplinary research covering the technical, empirical, and theoretical aspects of collaboration and computer systems. The 20 papers presented here have been selected via a rigorous reviewing process from 110 submissions. Both the number of submissions and the quality of the selected papers are testimony to the diversity and energy of the CSCW community. We trust that you will find the papers interesting and that they will serve to stimulate further quality work within the community. The technical papers are complemented by a wider set of activities at ECSCW 2003, including tutorials, workshops, demonstrations, videos, posters and a doctoral colloquium. Together these provide rich opportunities for discussion, learning and exploration of the more recent and novel issues in the field. This conference could not have taken place without considerable enthusiasm, support and participation, not to mention the hard work of a number of people. In particular, we would like to thank the following: • The authors, representing over 17 countries and 97 institutions, who submitted a paper. So many submissions of such high quality are the basis of a good conference. • The members of the program committee who so diligently reviewed and discussed papers. Their collective decisions result in a good scientific program and their feedback to authors strengthens the work of the community.

Greek and Roman Calendars Jun 26 2022 The smooth functioning of an ordered society depends on the possession of a means of regularising its activities over time. That means is a calendar, and its regularity is a function of how well it models the more or less regular movements of the celestial bodies - of the moon, the sun or the stars. Greek and Roman Calendars examines the ancient calendar as just such a time-piece, whose elements are readily described in astronomical and mathematical terms. The story of these calendars is one of a continuous struggle to maintain a correspondence with the regularity of the seasons and the sun, despite the fact that the calendars were usually based on the irregular moon. But on another, more human level, Greek and Roman Calendars steps beyond the merely mathematical and studies the calendar as a social instrument, which people used to organise their activities. It sets the calendars of the Greeks and Romans on a stage occupied by real people, who developed and lived with these time-pieces for a variety of purposes - agricultural, religious, political and economic. This is also a story of intersecting cultures, of Greeks with Greeks, of Greeks with Persians and Egyptians, and of Greeks with Romans, in which various calendaric traditions clashed or compromised.

Planning and Control Using Microsoft Project and PMBOK Guide Dec 21 2021 This is a user guide and training manual written for Project Management Professionals following the "PMBOK[registered] Guide Third Edition" who wish to learn how to schedule projects in a single project environment with or without Resources with Microsoft Project. The book is packed with screen shots, constructive tips and is suitable as a training course handout, for learning the software or as a reference book. The book contains workshops with solutions at the end of each chapter for the reader to practice the skills taught in the chapter. The book is based on the Microsoft Project 2007 but may be used with Microsoft Project 2000, 2002 or 2003 as the book points out the differences. This book was written for people learning to use Microsoft Project in a project environment applying the "PMBOK[registered] Guide Third Edition" processes. It aims to teach readers how to plan and control projects created within the software package and stays focused on explaining how to use Microsoft Project to schedule projects by: explaining which "PMBOK[registered] Guide" processes the software will support and which it will not support; and concentrating on the core functions required to plan and schedule a project. It also presents workable solutions to real day to day planning and scheduling problems and contains practical advice on how to set up the software and import data; each subject is covered in one chapter and the reader does not have to flick backwards and forwards through the book to read about a subject; explains some of the important difference between Microsoft Project and other scheduling software; explains some of the more difficult calculations often omitted in other books; includes exercises to reinforce the learning outcomes, a large number of screen dumps, numerous tips, a detailed index and command list at the start of each chapter as a quick reference; and it has a chapter dedicated to the new functions available in Microsoft Project 2007.

Multilingualism from Manuscript to 3D May 26 2022 This collection explores the links between multimodality and multilingualism, charting the interplay between languages, channels, and forms of communication in multilingual written texts from historical manuscripts through to the new media of today and the non-verbal associations they evoke. The volume argues that features of written texts such as graphics, layout, boundary marking, and typography are inseparable from verbal content. Taken together, the chapters adopt a systematic historical perspective to investigate this interplay over time and highlight the ways in which the two disciplines might further inform one another in the future as new technologies emerge. The first half of the volume considers texts where semiotic resources are the sites of modes, where multiple linguistic codes interact on the page and generate extralinguistic associations through visual features and spatial organization. The second half of the book looks at texts where this interface occurs not in the text but rather in the cultural practices involved in social materiality and text transmission. Enhancing our understandings of multimodal resources in both historical and contemporary communication, this book will be of interest to scholars in multimodality, multilingualism, historical communication, discourse analysis, and cultural studies.

Handbook of Research on Schools, Schooling and Human Development Jan 10 2021 Children spend more time in school than in any social institution outside the home. And schools probably exert more influence on children's development and life chances than any environment beyond the home and neighbourhood. The purpose of this book is to document some important ways schools influence children's development and to describe various models and methods for studying schooling effects. Key features include: Comprehensive Coverage - this is the first book to provide a comprehensive review of what is known about schools as a context for human development. Topical coverage ranges from theoretical foundations to investigative methodologies and from classroom-level influences such as teacher-student relations to broader influences such as school organization and educational policies. Cross-Disciplinary - this volume brings together the divergent perspectives, methods and findings of scholars from a variety of disciplines, among them educational psychology, developmental psychology, school psychology, social psychology, psychiatry, sociology, and educational policy. Chapter Structure - to ensure continuity, chapter authors describe 1) how schooling influences are conceptualized 2) identify their

theoretical and methodological approaches 3) discuss the strengths and weaknesses of existing research and 4) highlight implications for future research, practice, and policy. Methodologies - chapters included in the text feature various methodologies including longitudinal studies, hierarchical linear models, experimental and quasi-experimental designs, and mixed methods.
