"Tense, atmospheric, and gorgeously written, *The Summer Country* is a novel to savor!" – Kate Quinn, New York Times bestselling author of *The Huntress* and *The Alice Network* A brilliant, multigenerational saga in the tradition of *The Thorn Birds* and *North and South*, New York Times bestselling historical novelist Lauren Willig delivers her biggest, boldest, and most ambitious novel yet—a sweeping Victorian epic of lost love, lies, jealousy, and rebellion set in colonial Barbados. Barbados, 1854: Emily Dawson has always been the poor cousin in a prosperous English

merchant clan-- merely a vicar's daughter, and a reform-minded vicar's daughter, at that. Everyone knows that the family's lucrative shipping business will go to her cousin, Adam, one day. But when her grandfather dies, Emily receives an unexpected inheritance: Peverills, a sugar plantation in Barbados—a plantation her grandfather never told anyone he owned. When Emily accompanies her cousin and his new wife to Barbados, she finds Peverills a burnt-out shell, reduced to ruins in 1816, when a rising of enslaved people sent the island up in flames. Rumors swirl around the derelict plantation; people whisper of ghosts. Why would her practical-minded grandfather leave her a property in ruins? Why are the neighboring plantation owners, the Davenants, so eager to acquire Peverills? The answer lies in the past— a tangled history of lies, greed, clandestine love, heartbreaking betrayal, and a bold bid for freedom. **THE SUMMER COUNTRY** will beguile readers with its rendering of families, heartbreak, and the endurance of hope against all odds. Tales of All Countries is a collection of stories in two volumes; the first was published in 1861, the second in 1863. In a variety of settings, the stories bring into consideration the societies and cultures of various countries, the fidelity of human nature, and the existence of universal ethics and values. An Unprotected Female at the Pyramids, The Man Who Kept His Money in a Box, and Mrs. General Talboys are some of the works included in this collection. "Carl's perspective is truly unique and insightful in understanding the global economy and the geopolitical situation today, which is why this book is so helpful and timely." - Steve Forbes Will America remain the world's preeminent power? Could emerging market countries like China challenge our leadership? Can America avoid the low growth, high debt fate of Japan and Europe? Learn how America can stay a dynamic global leader by following a pro-growth economic agenda, rebalancing eight key relationships, growing with emerging markets, pursuing a realistic China policy, and executing a forward-leaning trade policy as well as a conservative foreign policy. This book is a blueprint for America to remain the strongest and the most prosperous, independent, respected, and influential nation in the world. We just need to follow it to build both a new American century. Bestselling author and renowned economist Lester Thurow argues forcefully that globalization is not a done deal and we must seize the moment now if we are to create a new global economy in which all can prosper. In this new book, Thurow examines the newly-forming global economy, with a special focus on the role of the US and the dangers to our own national well-being. He examines such questions as: What's at stake for us in the global economy? Why is it important that the system be equitable and that

other countries prosper along with us? What should our goals as a nation be – long term and short term? What are the tough choices that need to be made in our relationship with other countries and world regulatory bodies? What role should we be playing globally? What are the political, economic, social choices / tradeoffs we will have to confront? Thurow contends that the huge and growing US trade deficit poses grave dangers to the value of the dollar and is putting our own economy in jeopardy. As the world economy leaps national boundaries, its hallmark seems to be a rising instability and a growing inequality between the first and third worlds. Financial crises in the third world come ever more frequently and seem to be ever more severe. The first world economies seem to be in ever more frantic boom and bust cycles. Globalization causes riots throughout the world and is one factor in the rise of terrorism against the West. Thurow shows how some nations, including Ireland and China, have embraced the concept of globalization and placed themselves into a position to prosper with growing and productive national economies. He contrasts their positive actions with Japan, whose leaders have allowed the nation to drift into stagnation and have destroyed its prosperity. He argues that this is the time to choose globalization or be left behind, the time to "build a global economy that eliminates the defects," and he provides plenty of ideas for corporations, governments, economists, and citizens to act upon. According to conventional wisdom, American social policy has always been exceptional--exceptionally stingy and backwards. But Edwin Amenta reminds us here that sixty years ago the United States led the world in spending on social provision. He combines history and political theory to account for this surprising fact--and to explain why the country's leading role was short-lived. The orthodox view is that American social policy began in the 1930s as a two-track system of miserly "welfare" for the unemployed and generous "social security" for the elderly. However, Amenta shows that the New Deal was in fact a bold program of relief, committed to providing jobs and income support for the unemployed. Social security was, by comparison, a policy afterthought. By the late 1930s, he shows, the U.S. pledged more of its gross national product to relief programs than did any other major industrial country. Amenta develops and uses an institutional politics theory to explain how social policy expansion was driven by northern Democrats, state-based reformers, and political outsiders. And he shows that retrenchment in the 1940s was led by politicians from areas where beneficiaries of

relief were barred from voting. He also considers why some programs were nationalized, why some states had far-reaching "little New Deals," and why Britain--otherwise so similar to the United States--adopted more generous social programs. Bold Relief will transform our understanding of the roots of American social policy and of the institutional and political dynamics that will shape its future. Have you ever wondered what it will take to transform each African country into a prosperous nation where each citizen has a real opportunity to thrive? Africa's narrative has been shaped by a vision of the future that remains bleak. A vision that says a little more is okay for the African. It is time to challenge and change our paradigm of what great outcomes look like for an African country. It is time for The Bold New Normal of an Africa where citizens of each country genuinely have the opportunity to prosper. The formula for sustainable prosperity has been tried and tested world over. Why then do we continue to hope that a different method, that has thus far failed the continent, will create sustainable prosperity? The Bold New Normal is a timely publication that coincides with the 400th anniversary of the start of slavery: the year of return. 400 years since the unraveling of African began, it is time to piece her back together and focus forward. It is surely the time for The Bold New Normal! We live in tough times, and it seems many are unhappy with their circumstances in society, at work, or at home. Instead of taking action, we complain and wait for someone else to do something about it. Instead of changing ourselves, we hope others will take responsibility. Instead of actively living our dreams, we wait for the perfect moment. Unfortunately, that moment will never come. Author Ilja Grzeskowitz has declared war on this passive wait-and-see approach. In Think it. Do it. Change it., he offers a plan for overcoming the fear of change. Grzeskowitz, who helps organizations all over the world to create a culture of change, details his step-by-step approach to dreaming big, acting boldly, and getting the results you want. He shows you how motivation really works, why the fear of change is actually your best friend, and which two words have the potential to change your entire life. Grzeskowitz reveals the biggest motivational myths, announces the comeback of values, and shows you the most important characteristic that will help you to actively implement the necessary changes in business and in life. Think it. Do it. Change it. helps you live a life characterized by possibilities rather than limitations. Sebastian Bold with his group of high school friends contrive to create adventures while ignoring the dangers they face. From

stealing a birthday cake to swimming in a dangerous river, to making explosive bombs and taking risky train rides, they challenge life at every turn. Sebastian falls in love with the beautiful Julie, only to be heartbroken when she leaves the country when political tension escalates. Set in the city of Georgetown in British Guiana, just before it became an independent country, this rollicking adventure story takes place over a five-year period. A provocative approach to the Israeli-Palestinian conflict—one state for two peoples—that is sure to touch nerves on all sides The Israeli-Palestinian war has been called the world's most intractable conflict. It is by now a commonplace that the only way to end the violence is to divide the territory in two, and all efforts at a resolution have come down to haggling over who gets what: Will Israel hand over 90 percent of the West Bank or only 60 percent? Will a Palestinian state include any part of Jerusalem? Clear-eyed, sharply reasoned, and compassionate, One Country proposes a radical alternative: to revive an old and neglected idea of one state shared by two peoples. Ali Abunimah shows how the two are by now so intertwined—geographically and economically—that separation cannot lead to the security Israelis need or the rights Palestinians must have. He reveals the bankruptcy of the two-state approach, takes on the objections and taboos that stand in the way of a binational solution, and demonstrates that sharing the territory will bring benefits for all. The absence of other workable options has only led to ever greater extremism; it is time, Abunimah suggests, for Palestinians and Israelis to imagine a different future and a different relationship. Features one hundred recipes made at the chef's restaurant in Napa Valley, California, along with comments about success in the restaurant industry, Italian cuisine, and the history behind certain entrees. ?Following on from his bestselling The Invisible Church, Steve Aisthorpe finds inspiration for his new book in the ecological concept of rewilding, an approach to the environment that allows nature to break free from the dulling effects of strategic control and bring wonder back into our lives. Applying this thinking to the Church, Steve Aisthorpe imagines what might happen if we put less faith in our strategies and plans, which inevitably depend on our own capabilities and resources, and allow the Spirit to lead us beyond our capacity to imagine. Rewilding the Church explores afresh the compelling invitation of Jesus to 'Follow me' and the call to 'throw off everything that hinders and entangles'. It poses provocative questions and issues a call to contribute to the great rewilding of the Church – and to be rewilded

ourselves. The same human instincts that have disrupted our natural environment have also constrained and domesticated the Church and Rewilding the Church commends a rediscovery of the adventure of faith. Steve Aisthorpe is one the freshest and most original voices in the church today. **BROKEN TO BOLD** offers a transparent, riveting story of redemption and hope. From the highs and lows of life and career to practical insights with day-to-day application, Kennedy presents a memorable work that's sure to leave you changed. Written as though talking to a friend, Broken to Bold is easy to grasp, relatable, endearing, and is sure to stir the heart of the reader in new ways! What is it like in Australia's high country? Matthew Higgins traces the mountain experience in a rich variety of ways. First, he talks of his own times in the alps as a bushwalker, cross-country skier, historian and oral-history interviewer. Then Matthew profiles a range of people who have worked, lived, or played in the mountains: stockmen; skiers; Indigenous parks officers; rangers; brumby runners (brumby is the word for the wild horses found on the Australian Alps); foresters; authors; tourism operators; and others. Central themes of place, people and story are interwoven with concerns about environmental impact and climate change. An extensive collection of beautiful images helps to tell this magnificent mountain story, from Kosciuszko to Kiandra, Brindabella to Bimberi, and Bogong to Tidbinbilla and beyond. Matthew Higgins has been walking, skiing and researching the Australian high country for decades. He has worked at leading national cultural institutions in Canberra and written numbers of books and numerous articles, while regularly speaking about Australia's Alps to a range of audiences. [Subject: Sociology, Environmental Studies] Three extraordinary people in some most extraordinary times: It's Dissolution Summer and as the United Kingdom prepares to break up into separate nations, the Counterculturals have gathered for a festival where everything's allowed. Among them is a talented little brat called Fiorinda, rock and roll princess by birth, searching for her father, the legendary Rufus O'Niall. Instead, she finds Ax Preston, the softly spoken guitarman with bizarre delusions about saving the country from the dark ages. Together with Sage Pender, technowizard king of the lads, they join the pop-icon team that's supposed to make the government look cool. Rock Legends. True Romance. A stunning fantasy about England. This book, based on detailed studies of eight innovations in mathematics and science education, has many insights to offer on current school reform. Since each

innovation studied has taken its own unique approach, the set as a whole spans the spectrum from curriculum development to systemic reform, from concentrating on particular school populations to addressing all of K-12 education. Yet these reform projects share a common context, a world view on what matters in science and mathematics for students of the 1990s and beyond, convictions about what constitutes effective instruction, and some notions about how school change can be brought about. These commonalities are drawn out in the book and illustrated with examples from the individual case studies that are reported in full in *Bold Ventures*, Volumes 2 and 3. The eight innovations—all of them projects that are well-known, at least by name, to U. S. audiences—are briefly described in chapter 1. Each was the subject of an in-depth, three-year case study. The research teams analyzed many documents, attended numerous project meetings, visited multiple sites, conducted dozens of individual interviews. The team leaders, having spent much time with mathematics or science education over long careers, looked at these reform projects through several lenses; the teams sifted through the mountains of data they had collected in order to tell the story of each project in rich detail. A hard-hitting exposé of SEAL Team 6, the US military's best-known brand, that reveals how the Navy SEALs were formed, then sacrificed, in service of American empire. The Navy SEALs are, in the eyes of many Americans, the ultimate heroes. When they killed Osama Bin Laden in 2011, it was celebrated as a massive victory. Former SEALs rake in cash as leadership consultants for corporations, and young military-bound men dream of serving in their ranks. But the SEALs have lost their bearings. Investigative journalist Matthew Cole tells the story of the most lauded unit, SEAL Team 6, revealing a troubling pattern of war crimes and the deep moral rot beneath authorized narratives. From their origins in World War II, the SEALs have trained to be specialized killers with short missions. As the wars in Iraq and Afghanistan became the endless War on Terror, their violence spiraled out of control. *Code Over Country* details the high-level decisions that unleashed the SEALs' carnage and the coverups that prevented their crimes from coming to light. It is a necessary and rigorous investigation of the unchecked power of the military—and the harms enacted by and upon soldiers in America's name. *Bold Endeavors* is a compelling narrative of ten large and transformative events in American history. It is an absorbing journey through the past as we read about determined national leaders -- Jefferson,

Lincoln, Teddy Roosevelt, FDR, and Eisenhower -- who found the will, steadiness, and political acumen to make decisions that were often unpopular but that proved to be visionary -- decisions that are the building blocks of America's destiny. Rohatyn begins with the diplomatic intrigues of the Louisiana Purchase, which doubled the size of the country; moves to the controversial construction of the Erie Canal, which opened a water route to the West; then continues to Lincoln's resolute support for the transcontinental railroad, Land Grant colleges, and the Homestead Act; documents the strategy -- and ruthless determination -- that built the Panama Canal; details the visionary and pragmatic politics that allowed FDR to bring electricity to rural America and use the Reconstruction Finance Act to help pull the country from the grip of the Depression; captures the foresight of national purpose which led to the G.I. Bill, which propelled the nation forward; and describes the creation of the interstate highway system that modernized America. *Bold Endeavors* is an urgent call for present-day action in this time of grave national crisis. "The nation is falling apart -- literally," Rohatyn warns. "America's roads and bridges, schools and hospitals, airports and roadways, ports and dams, water lines and air control systems -- the country's entire infrastructure is rapidly and dangerously deteriorating." To reverse this catastrophic degeneration and create tens of thousands of new jobs, Rohatyn offers a carefully reasoned and practical solution. Bold and imaginative political leadership must use the power and the resources of the federal government to finance the rebuilding of the nation's infrastructure. Rohatyn's page-turning case studies are precedents for purposeful, resourceful, and tenacious leadership that is necessary to accomplish both the rebuilding of America and the country's emergence from its present financial crisis. These bold endeavors from the nation's past are instructive, a guide and an inspiration for Americans today. If the nation is to be rebuilt and its infrastructure renewed, if the country is to emerge from the present economic crisis and reclaim its position of unqualified strength and leadership in world affairs, then it must be guided by the vision, determination, and investments that originally helped create a secure and prosperous America. *Bold* is a radical how-to guide for using exponential technologies, moonshot thinking, and crowd-powered tools to create extraordinary wealth while also positively impacting the lives of billions. A follow-up to the authors' *Abundance* (2012). Have you ever wanted to be a bigger, braver version of yourself? Can you imagine how that
