The First 20 Hours Nov 27 2019 Josh Kaufman, bestselling author of *The Personal MBA*, is back with his new book, *The First Twenty Hours*, to teach readers how to learn anything... fast! 'Lots of books promise to change your life. This one actually will' -Seth Godin Pick up any new skill in just 20 hours... Want to learn to paint, play the piano, launch a business, fly a plane? Then pick up this book and set aside twenty hours to go from knowing nothing to performing like a pro. That's it. Josh Kaufman, author of international bestseller *The Personal MBA*, has developed this brilliant approach to mastering anything fast. You'll learn how to:

- Focus energy on acquiring key skill sets
- Eliminate obstacles and discover critical tools
- Create rapid feedback loops
- Work against the clock to get better fast

With examples ranging from writing a web program to learning an instrument to picking up windsurfing, Kaufman shows how to break complexity into simple tasks, make the very best of your limited time and solve unexpected problems. In *The First 20 Hours* you'll learn how to acquire any skill in record time - and have a lot of fun along the way. 'After reading this, you'll be ready to take on any number of skills and make progress on that big project you've been putting off for years' Chris Guillebeau, author of *The \$100 Startup*

Learning to Teach in the Primary School Mar 12 2021 Flexible, effective and creative primary

school teachers require subject knowledge, an understanding of their pupils and how they learn, a range of strategies for managing behaviour and organising environments for learning, and the ability to respond to dynamic classroom situations. This third edition of *Learning to Teach in the Primary School* is fully updated with reference to the new National Curriculum, and has been revised to provide even more practical advice and guidance to trainee primary teachers. Twenty-two new authors have been involved and connections are now made to Northern Irish, Welsh and Scottish policies. In addition, five new units have been included on: making the most of your placement play and exploration in learning behaviour management special educational needs phonics. With Masters-level reflective tasks and suggestions for research-based further reading, the book provides valuable support to trainee teachers engaged in learning through school-based experience and through reading, discussion and reflections as part of a teacher education course. It provides an accessible and engaging introduction to knowledge about teaching and learning that every student teacher needs to acquire in order to gain qualified teacher status (QTS). This comprehensive textbook is essential reading for all students training to be primary school teachers, including those on undergraduate teacher training courses (BEd, BA

with QTS, BSc with QTS), postgraduate teacher training courses (PGCE, SCITT) and employment-based teacher training courses (Schools Direct, Teach First), plus those studying Education Studies. This textbook is supported by a free companion website with additional resources for instructors and students and can be accessed at www.routledge.com/cw/Cremin.

Learning to Labor Nov 07 2020 A landmark work in sociology, cultural studies, and ethnography since its publication in 1977, Paul Willis's *Learning to Labor* is a provocative and troubling account of how education links culture and class in the reproduction of social hierarchy. Willis observed a working-class friendship group in an English industrial town in the West Midlands in their final years at school. These "lads" rebelled against the rules and values of the school, creating their own culture of opposition. Yet this resistance to official norms, Willis argues, prepared these students for working-class employment. Rebelling against authority made the lads experience the constraints that held them in subordinate class positions as choices of their own volition. *Learning to Labor* demonstrates the pervasiveness of class in lived experience. Its detailed and sympathetic ethnography emphasizes subjectivity and the role of working-class people in making their culture. Willis shows how resistance does not simply challenge the social order, but also

constitutes it. The lessons of Learning to Labor apply as much to the United States as to the United Kingdom, especially the finding that education, rather than helping overcome hierarchies, can often perpetuate them, which is of renewed relevance at a time when education is trumpeted as meritocratic and a panacea for inequality.

The Anarchist Cookbook Feb 08 2021 The Anarchist Cookbook will shock, it will disturb, it will provoke. It places in historical perspective an era when "Turn on, Burn down, Blow up" are revolutionary slogans of the day. Says the author "This book... is not written for the members of fringe political groups, such as the Weatherman, or The Minutemen. Those radical groups don't need this book. They already know everything that's in here. If the real people of America, the silent majority, are going to survive, they must educate themselves. That is the purpose of this book." In what the author considers a survival guide, there is explicit information on the uses and effects of drugs, ranging from pot to heroin to peanuts. There is detailed advice concerning electronics, sabotage, and surveillance, with data on everything from bugs to scramblers. There is a comprehensive chapter on natural, non-lethal, and lethal weapons, running the gamut from cattle prods to sub-machine guns to bows and arrows.

Understand and Care Oct 31 2022 Empathy is key to positive, healthy relationships. This book

builds empathy in children. In clear, child-friendly words and illustrations, it helps them to understand that other people have feelings like theirs—and different from theirs. It guides children to show they care by listening to others and respecting their feelings. Includes questions to discuss and empathy games to play.

Habits of Success: Getting Every Student Learning
Sep 05 2020 For students to benefit from lessons, they must attend, listen, and try their best. But at times, almost all teachers struggle to manage classroom behavior, and to motivate students to learn. Drawing on decades of research on behavioral science, this book offers teachers practical strategies to get students learning. The key is students' habits. This book reveals simple, powerful ways to help students build habits of success. Harry Fletcher-Wood shows how teachers can use behavioral science techniques to increase motivation and improve behavior. He offers clear guidance on topics such as using role models to motivate students, making detailed plans to help students act, and building habits to ensure students keep going. The book addresses five challenges teachers face in encouraging desirable behavior: Choosing what change to prioritize Convincing students to change Encouraging students to commit to a plan Making starting easy Ensuring students keep going Workshops, checklists and real-life

examples illustrate how these ideas work in the classroom and make the book a resource to revisit and share. Distilling the evidence into clear principles, this innovative book is a valuable resource for new and experienced teachers alike.

R for Data Science Dec 29 2019 Learn how to use R to turn raw data into insight, knowledge, and understanding. This book introduces you to R, RStudio, and the tidyverse, a collection of R packages designed to work together to make data science fast, fluent, and fun. Suitable for readers with no previous programming experience, *R for Data Science* is designed to get you doing data science as quickly as possible. Authors Hadley Wickham and Garrett Grolemund guide you through the steps of importing, wrangling, exploring, and modeling your data and communicating the results. You'll get a complete, big-picture understanding of the data science cycle, along with basic tools you need to manage the details. Each section of the book is paired with exercises to help you practice what you've learned along the way. You'll learn how to: Wrangle—transform your datasets into a form convenient for analysis Program—learn powerful R tools for solving data problems with greater clarity and ease Explore—examine your data, generate hypotheses, and quickly test them Model—provide a low-dimensional summary that captures true "signals" in your dataset Communicate—learn R

Markdown for integrating prose, code, and results
Be Polite and Kind Sep 29 2022 When children are kind, courteous, and respectful, people enjoy being around them and reciprocate with the same behavior. This book helps kids understand the importance of showing politeness, speaking kindly, using basic courtesies (“please,” “thank you,” “excuse me”), and respecting the feelings of others. Scenarios and role-play activities help adults reinforce the book’s lessons.

Try and Stick with It Jan 22 2022 It’s hard to try new things—for adults as well as children. It’s even harder to stay the course when something is more difficult than we thought it would be, or when things don’t work out the way we hoped. Yet flexibility and perseverance are essential to success in all areas of life, at all ages and stages. This book introduces children to the benefits of trying something new and the basics of stick-to-it-iveness. Includes suggestions adults can use to reinforce the ideas and skills being taught.

Learning to Make a Difference Mar 24 2022 This book updates Social Learning Theory, offering a practical and rigorous way to develop the capacity to bring about change.

How to Learn Almost Anything in 48 Hours Oct 07 2020 Shortcuts and brain hacks for learning new skills fast! Three-time Australian Memory Champion Tansel Ali reveals the secret to learning new skills

fast--easy-to-learn memory strategies, including mind mapping, visualization techniques, and mnemonic devices. If you'd like to study for exams efficiently, speak a foreign language, memorize a speech, learn to play a new musical instrument, or improve your general knowledge, memory-training expert Tansel shows you how to do it quickly and effectively with the aid of a few memory tricks. Packed with practical exercises for honing memory and training your brain to learn well and learn fast, this is the ultimate book for sharpening your mind and expand your knowledge.

Talk and Work It Out Dec 01 2022 Clear, simple language and realistic illustrations teach children the process of peaceful conflict resolution.

Learning Go Aug 24 2019 Go is rapidly becoming the preferred language for building web services. While there are plenty of tutorials available that teach Go's syntax to developers with experience in other programming languages, tutorials aren't enough. They don't teach Go's idioms, so developers end up recreating patterns that don't make sense in a Go context. This practical guide provides the essential background you need to write clear and idiomatic Go. No matter your level of experience, you'll learn how to think like a Go developer. Author Jon Bodner introduces the design patterns experienced Go developers have adopted and explores the rationale for using them. You'll also

get a preview of Go's upcoming generics support and how it fits into the language. Learn how to write idiomatic code in Go and design a Go project Understand the reasons for the design decisions in Go Set up a Go development environment for a solo developer or team Learn how and when to use reflection, unsafe, and cgo Discover how Go's features allow the language to run efficiently Know which Go features you should use sparingly or not at all

Cool Down and Work Through Anger Jun 26

2022 Everyone gets angry, so it's never too early for children to learn to recognize feelings of anger, express them, and build skills for coping with anger in helpful, appropriate ways. Children learn that it is okay to feel angry—but not okay to hurt anyone with actions or words. They discover concrete skills for working through anger: self-calming, thinking, getting help from a trusted person, talking and listening, apologizing, being patient, and viewing others positively. Reassuring and supportive, the book helps preschool and primary-age children see that when they cool down and work through anger, they can feel peaceful again.

Learning How to Learn Sep 17 2021 A

surprisingly simple way for students to master any subject--based on one of the world's most popular online courses and the bestselling book A Mind for Numbers A Mind for Numbers and its wildly popular

online companion course "Learning How to Learn" have empowered more than two million learners of all ages from around the world to master subjects that they once struggled with. Fans often wish they'd discovered these learning strategies earlier and ask how they can help their kids master these skills as well. Now in this new book for kids and teens, the authors reveal how to make the most of time spent studying. We all have the tools to learn what might not seem to come naturally to us at first--the secret is to understand how the brain works so we can unlock its power. This book explains:

- Why sometimes letting your mind wander is an important part of the learning process
- How to avoid "rut think" in order to think outside the box
- Why having a poor memory can be a good thing
- The value of metaphors in developing understanding
- A simple, yet powerful, way to stop procrastinating

Filled with illustrations, application questions, and exercises, this book makes learning easy and fun.

How to Get Your Child Off the Refrigerator and on to Learning Jan 28 2020 This is the only resource out there for an audience that is desperately seeking it. Using techniques highly successful with any child who struggles with focus, parents learn how to teach their child tomorrow. Includes reproducible aids.

Learning to Improve Oct 19 2021 As a field,

education has largely failed to learn from experience. Time after time, promising education reforms fall short of their goals and are abandoned as other promising ideas take their place. In *Learning to Improve*, the authors argue for a new approach. Rather than “implementing fast and learning slow,” they believe educators should adopt a more rigorous approach to improvement that allows the field to “learn fast to implement well.” Using ideas borrowed from improvement science, the authors show how a process of disciplined inquiry can be combined with the use of networks to identify, adapt, and successfully scale up promising interventions in education. Organized around six core principles, the book shows how “networked improvement communities” can bring together researchers and practitioners to accelerate learning in key areas of education. Examples include efforts to address the high rates of failure among students in community college remedial math courses and strategies for improving feedback to novice teachers. *Learning to Improve* offers a new paradigm for research and development in education that promises to be a powerful driver of improvement for the nation’s schools and colleges.

Powerful Teaching Jun 02 2020 Unleash powerful teaching and the science of learning in your classroom *Powerful Teaching: Unleash the Science of Learning* empowers educators to harness rigorous

research on how students learn and unleash it in their classrooms. In this book, cognitive scientist Pooja K. Agarwal, Ph.D., and veteran K-12 teacher Patrice M. Bain, Ed.S., decipher cognitive science research and illustrate ways to successfully apply the science of learning in classrooms settings. This practical resource is filled with evidence-based strategies that are easily implemented in less than a minute—without additional prepping, grading, or funding! Research demonstrates that these powerful strategies raise student achievement by a letter grade or more; boost learning for diverse students, grade levels, and subject areas; and enhance students' higher order learning and transfer of knowledge beyond the classroom. Drawing on a fifteen-year scientist-teacher collaboration, more than 100 years of research on learning, and rich experiences from educators in K-12 and higher education, the authors present highly accessible step-by-step guidance on how to transform teaching with four essential strategies: Retrieval practice, spacing, interleaving, and feedback-driven metacognition. With *Powerful Teaching*, you will:

- Develop a deep understanding of powerful teaching strategies based on the science of learning
- Gain insight from real-world examples of how evidence-based strategies are being implemented in a variety of academic settings
- Think critically about your current teaching practices from a research-based

perspective Develop tools to share the science of learning with students and parents, ensuring success inside and outside the classroom Powerful Teaching: Unleash the Science of Learning is an indispensable resource for educators who want to take their instruction to the next level. Equipped with scientific knowledge and evidence-based tools, turn your teaching into powerful teaching and unleash student learning in your classroom.

Don't You Get It? Living with Auditory Learning Disabilities Feb 29 2020 ""Don't You Get It?"" specifically looks at people over three generations of the same family and others as well, who have lived with APD. It demonstrates the struggles that these people went through and shows how they worked and overcame their problems in communicating and learning. keywords: Auditory, Processing, Learning, Disability, Hearing, Psychology, Guide, Handbook, Comprehensive, APD.

Listen and Learn Dec 21 2021 Knowing how to listen is essential to learning, growing, and getting along with others. Simple words and inviting illustrations help children develop skills for listening, understand why it's important to listen, and recognize the positive results of listening. Includes a note to teachers and parents, additional information for adults, and activities.

How People Learn Sep 25 2019 First released in the Spring of 1999, How People Learn has been

expanded to show how the theories and insights from the original book can translate into actions and practice, now making a real connection between classroom activities and learning behavior. This edition includes far-reaching suggestions for research that could increase the impact that classroom teaching has on actual learning. Like the original edition, this book offers exciting new research about the mind and the brain that provides answers to a number of compelling questions. When do infants begin to learn? How do experts learn and how is this different from non-experts? What can teachers and schools do—with curricula, classroom settings, and teaching methods—to help children learn most effectively? New evidence from many branches of science has significantly added to our understanding of what it means to know, from the neural processes that occur during learning to the influence of culture on what people see and absorb. *How People Learn* examines these findings and their implications for what we teach, how we teach it, and how we assess what our children learn. The book uses exemplary teaching to illustrate how approaches based on what we now know result in in-depth learning. This new knowledge calls into question concepts and practices firmly entrenched in our current education system. Topics include: How learning actually changes the physical structure of the brain. How existing knowledge

affects what people notice and how they learn. What the thought processes of experts tell us about how to teach. The amazing learning potential of infants. The relationship of classroom learning and everyday settings of community and workplace. Learning needs and opportunities for teachers. A realistic look at the role of technology in education.

Reach Out and Give May 02 2020 Introduces the concept of gratitude and how it leads to generosity and demonstrates the various ways people can be generous, including donating time, money, or objects.

The Learning to Get Along Series Interactive Software Nov 19 2021 Praised by parents, embraced by educators, our complete Learning to Get Along series is now available in one kid-friendly software package (for Windows only). Teachers can choose which books to make available to each child, manage audio features, and track students' progress. Children follow along or read on their own, using a special highlight feature to click and hear word definitions. A sequence of questions follows each book; test results are stored for teacher review in individual student files. Designed for classroom use, yet equally useful at home. User's Guide included. Developed in association with Attainment Company.

101 Ways to Make Learning Active Beyond the Classroom Apr 12 2021 Fresh, creative

strategies guaranteed to enliven online training 101
Ways to Make Learning Active Beyond the Classroom provides proven, practical strategies, activities, and tips for those tasked with facilitating training in any subject area among alternative settings. Based on the best-selling Active Training approach, these methods have been designed by recognized experts, and are guaranteed to enliven any learning event. Readers will find a toolkit of ready-to-use exercises and tips for organizing, conducting, and delivering active learning, in alternative settings on the job or around the world. The book is organized in a way that allows trainers to quickly and easily identify strategies that hold the most promise for specific situations. Each strategy is illustrated with a case example that demonstrates the concepts in action. Two hundred tips organized in twenty how-to lists will prove invaluable for using Twitter, coaching virtually, encouraging informal learning, opening interactive virtual learning sessions, and much more. Coverage includes best practices for social media and informal learning, common e-learning tools, as well as guidance toward using a full gamut of tools from gamification and simulation to serious games and m-learning. Active training encourages participants to use their brains to study ideas, solve problems, and apply what they've learned. It's a fast-paced, fun, supportive, and personally engaging environment.

This book shows training facilitators the proven techniques that help learners get more out of the material. Design a more engaging learning environment Improve delivery with optimized technology Utilize effective learning tools and practical strategies Learn best practices for social media, coaching, virtual learning, and more Learners need to figure things out by themselves, ask questions, practice skills, and transfer skills and knowledge to the job. With proven strategies designed by industry leaders, *101 Ways to Make Learning Active Beyond the Classroom* is the indispensable guide to the design and delivery of effective alternative ways to learn.

Share and Take Turns Aug 29 2022 Sharing is a social skill all children need to learn—the sooner the better. Concrete examples and reinforcing illustrations help children practice sharing, understand how and why to share, and realize the benefits of sharing. Includes a note to teachers and parents, additional information for adults, and activities.

When I Feel Afraid Aug 17 2021 Children today have many fears, both real and imagined. Encouraging words and supportive illustrations guide children to face their fears and know where to turn for help. Little ones also learn simple ways to help themselves. Includes a special section for adults, with ideas for supporting children when they

feel afraid and a list of additional resources.

Learning to make change Jan 10 2021

Universities represent the highest level of education, yet they are notoriously slow in responding to a rapidly changing world. Deeply entrenched elitism and routines, a continued emphasis on reproductive learning, and the continued dominance of disciplinary thinking, have, in many instances, created bastions of educational conservatism, unable to contribute meaningfully to the development of people, businesses and communities within a finite global ecosystem. This book focuses on an African university's efforts to become more innovative and responsive to community needs and the challenges posed by sustainability. A central concept is innovation competence as a pre-requisite for transforming learning, research and consultancy. Making change in society requires innovation competences over and above disciplinary expertise and these competences have to be learnt by both staff and students. Kibwika not only shows that it is imperative that African universities re-orient their programmes to produce graduates capable of enhancing innovation and social change in the community, he also provides a number of solid stepping stones for capacity building and curriculum development that, in time, will result in an innovative university able to contribute to a world

that is more sustainable than the one currently in prospect.

My First Busy Day May 14 2021 Hands-on fun for you and your toddler as you recall My First Busy Day with this tabbed board book. With lots of colourful pictures, fun-filled questions, familiar activities and objects, your toddler will love learning about their busy day with this tactile board book. Read it together and help them turn the pages using the easy-grip picture tabs; from getting dressed and getting out and about, to learning to count and getting ready for bedtime. Fun questions on every page will help develop early speaking and listening skills. It's a great way to teach your child about things that happen on a busy day.

Getting Ready to Learn Jul 16 2021 Getting Ready to Learn describes how educational media have and are continuing to play a role in meeting the learning needs of children, parents, and teachers. Based on years of meaningful data from the CPB-PBS Ready To Learn Initiative, chapters explore how to develop engaging, playful, and developmentally appropriate content. From Emmy-Award-winning series to randomized controlled trials, this book covers the media production, scholarly research and technological advances surrounding some of the country's most beloved programming.

Encouraging Learning Aug 05 2020 'I recommend this book to anyone wishing to help

children learn. In it you will find some lovely ideas for improving the way we encourage, support and praise all young people.' Professor Carol Dweck, author of *Mindset*, Stanford University, USA 'James has developed a rare skill for blending arresting anecdotes, hard-edged research and practical advice into a truly compelling narrative.' Professor Barry Hymer, author of the *Gifted and Talented Pocket Book*, Cumbria University, UK Over the last 20 years James Nottingham has studied how children learn. He has taught every age group in both primary and secondary schools, helped deaf teenagers deal with anger and isolation and even done philosophy with three-year-olds. In this inspiring, humorous, and practical book he shows what you can do to help children of all ages develop into confident, thoughtful and independent learners. Based around the acronym ASK, this book explores attitudes, skills and knowledge to learning – what is required and how to develop these skills more effectively. It shows how to encourage independent thinking and a spirit of inquiry in your children. Highlights include: the dangers of calling our children clever, bright and gifted; the best ways to teach wisdom; how to help children excel in exams; why curiosity did not kill the cat. With a foreword written by John Hattie, *Encouraging Learning* draws on research from some of the most respected experts on thinking and learning to identify the best

ways to help children learn more effectively, efficiently and co-operatively. For everyone living or working with children – particularly teachers, parents, carers and youth workers - this book shows you some of the best ways to enhance children's learning, including how to question, praise, and encourage more effectively.

Generating Learning Opportunities Jun 14 2021

Glo is a remarkable Southern-born girl who will permit you a close-up and transparent view of her life story. Glo's parents did not graduate from high school, but she gleaned something special from them that wasn't found in a textbook. She discovered a priceless connection between family values, actions, and academic achievement. Glo candidly offers perspectives and strategies from her life journey, personal parenting, academic endeavors, and professional career. Her path included a disconnected and abusive father, five children sharing one bed, a roach infestation, and multiple academic distractions. Yet she always had a loving and supportive family, tribe, community, and mother who strongly and consistently advocated for her family. The goal of this book is to help guide families, parents, caregivers, educators, and communities through practical and relevant tips toward building strong foundations that result in phenomenal life outcomes. Glo invites you to find your place among these pages a place that

resonates deeply within and propels you to take action in your own life and perhaps in the life of someone else too. May your destiny always lead toward generating learning opportunities.

Elevating Learning & Development (paperback) Jul 04 2020 The defining attributes of the 21st-century economy and fourth industrial revolution are innovation, technology, globalization, and a rapid pace of change. Therefore, an organization's capacity to enhance the capabilities of its workforce and create a culture of continuous learning are vital to remaining competitive. These trends make an effective learning-and-development (L&D) function more critical than ever. This compendium of articles, from L&D professionals at McKinsey & Company, discusses every facet of professional development and training-from ensuring that L&D's efforts are closely aligned with business strategy to elements of advancing the L&D function, designing learning solutions, deploying digital learning, executing flawlessly, measuring impact, and ensuring good governance. For L&D professionals seeking to hone their organization's efforts, *Elevating Learning & Development: Insights and Practical Guidance from the Field* is the ideal resource.

Be Careful and Stay Safe Apr 24 2022 The world can seem so perilous, especially where our children are concerned. But even very young children can learn basic skills for staying safe in ordinary

situations and preparing for emergencies. Without scaring kids (or alarming adults), this book teaches little ones how to avoid potentially dangerous situations, ask for help, follow directions, use things carefully, and plan ahead. Includes questions, activities, and safety games that reinforce the ideas being taught.

How to Get Good Grades Learning how to Study Oct 26 2019 Emphasizes that in addition to skills, in order to succeed students must value education and be aware of its relevance to their lives.

Join In and Play Jan 02 2023 It's fun to make friends and play with others, but it's not always easy to do. You have to make an effort, and you have to know the rules—like ask before joining in, take turns, play fair, and be a good sport. This book teaches the basics of cooperation, getting along, making friends, and being a friend. Includes ideas for games adults can use with kids to reinforce the skills being taught.

Be Honest and Tell the Truth May 26 2022 It's never too soon to learn the difference between what's true and what isn't. Words and pictures help young children discover that being honest in words and actions builds trust and self-confidence. They also learn that telling the truth sometimes takes courage and tact. Includes discussion questions, skits, scenarios, and games that reinforce the ideas being taught.

Make It Stick Feb 20 2022 Discusses the best methods of learning, describing how rereading and rote repetition are counterproductive and how such techniques as self-testing, spaced retrieval, and finding additional layers of information in new material can enhance learning.

Learn to Code. Get a Job. Mar 31 2020 Do you want to learn to code but don't know where to start? This book cuts through the noise and gives you a no-nonsense guide to learning and landing your first job as a software developer. Each chapter leaves you with actionable steps so you can get started right away. Here are the topics covered: * How to create a learning plan * How, when, and where to network as a software developer * How to market yourself to look professional * How to handle job applications and interviews * How to land your first job in the industry This is version 2 and has been completely updated and re-edited based off of feedback and changes in the tech industry.

Respect and Take Care of Things Jul 28 2022 Everything has a place. Things last longer when we take care of them. Respect, responsibility, and stewardship are concepts that even young children can relate to—because they have things they value. This book encourages children to pick up after themselves, put things back where they belong, and ask permission to use things that don't belong to them. It also teaches simple environmental

awareness: respecting and taking care of the earth. Includes ideas for adult-led activities and discussions.

Learning and Teaching in Higher Education Dec 09 2020 There is often little guidance available on how to teach in universities, despite there being increasing pressure to raise teaching standards, as well as no official requirement for academics to have any specific teaching qualification in many countries. This invaluable book comprehensively addresses this issue, providing an overview of teaching in a business school that covers all stages of student learning. p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 10.0px Arial}
