Our world is governed by the numbers generated by the accounts of nations and corporations. We depend on these numbers to direct our governments, our institutions, corporations, economies, societies. But where did they come from and how did they become so powerful?The answer to these questions begins in the Dark Ages in northern Italy with a new form of record keeping perfected by the merchants of Venice called double-entry bookkeeping. The story of double entry stars a Renaissance monk, mathematician, magician and constant companion of Leonardo da Vinci, his 27-page treatise for merchants, re. Although each of the pieces included in this collection has been cited as an outstanding contribution to the literature on the subject, they are not available in most libraries. Each of them is a classic on the theory of double-entry bookkeeping. Of the nine articles reprinted in this volume originally published in 1984, those by Ladelle, Hotelling and Anton are recognized as being the classic articles on the depreciation of a single ' machine '. Each of these articles was published in a journal that is often not accessible and reprinted here has brought them together in one place. For many years accountants have dealt with depreciation and capital maintenance as a static problem. This volume recognizes its dynamic aspects. Get A Copy Today New edition of a textbook intent on creating the kind of teachers that students remember for the rest of their lives. Covers early reading and writing development, building vocabulary and comprehension connections, using literature and reader response, and understanding language and cultural diversi Excerpt from Principles of Double-Entry Bookkeeping The purpose of this treatise, as its title implies, is to explain the principles which underlie the art of accounting by the double-entry method. It deals with the interpretation rather than the routine of bookkeeping, and limits the discussion to the three essential forms - the journal entry, the ledger account and the balance sheet. It does not propose any change in the routine, but it does propose a decided change in the interpretation of accounts and in the method of reporting results. What I claim for the book is that it solves the problem of placing double-entry bookkeeping upon a rational basis; and to the best of my knowledge and belief it presents the first and only solution of that problem. It is one of the strangest things in the history of the arts and sciences that this great system of accounting, which, by reason of its compactness and convenience, has come into almost universal use, should have attained so high a degree of development on the practical side, while on the theoretical side it is and always has been in a state of utter confusion. As a rule, the study of a useful art has a certain value as mental discipline; the art of accounting is the one exception to the rule. Aside from the so-called occult sciences, there is nothing which so tends to bewilder the mind and to dull the faculty of reason as the study of double-entry bookkeeping in the form in which it is customary to present it. Accounts Journal Accounts Journal book for keeping track of financial transactions - suitable for self employed, small business, office units, personal use, accounting and bookkeeping students, etc. Features: * Contains 110 pages of thick 90gsm high quality white paper * Size A4 - 297 x 210mm * Premium quality, durable matte finish bound cover for protection This book provides the reader with an opportunity to practice the double entry system of accounting or bookkeeping. It contains 40 cases which are each presented as a list of transactions for a full yearly cycle, and then the reader can then prepare a full set of journal entries, as well as a general ledger, trial balance, balance sheet, income statement, statement of retained earnings, and cashflow statement. The step-by-step solutions are provided as well, so that the student will be able to pinpoint exactly where any errors may have been made. The cases cover fictitious start-up companies with revenues from services and sales, as well as sales returns, various expenses, capital purchases, depreciation, shareholder investment and dividends, unearned revenue, prepaid expenses, the year-end closing entry to book the income statement accounts to retained earnings. Each case also includes a business loan, along with the loan amortization schedule which allows the student to practice posting journal entries for interest expense and loan repayments. This book does not teach

the theory, but instead it is intended to allow students to practice what they have learned in their introductory accounting or introductory bookkeeping course. This compilation concerns account books, not books on accounting. Most of the essays analyse the account book(s) of a single person or business. In each case the account book(s) demonstrate the presence of, at least, elements of double entry. The essays come in pairs, beginning with Geoffrey Lee ' s paper on Florentine bank ledger fragments of 1211, some of the earliest relics of Italian bookkeeping. Subsequent papers trace the development of double entry over the centuries until 1786 when full double entry was achieved. There are papers from the UK and USA which illustrate the use of balance sheets, valuation techniques and the accruals convention as well as papers which analyse the causes of the development of double entry, using the evidence of others.
