The Masonic rituals transcribed by Albert Pike in 1854 and 1855 from Albert G. Mackey and other sources. In a probing analysis of the oldest Buddhist texts, Julius Evola places the doctrine of liberation in its original context. The early teachings, he suggests, offer the foremost example of an active spirituality that is opposed to the more passive, modern forms of theistic religions. This sophisticated, highly readable analysis of the theory and practice of Buddhist asceticism, first published in Italian in 1943, elucidates the central truths of the eightfold path and clears away the later accretions of Buddhist doctrine. Evola describes the techniques for conscious liberation from the world of maya and for achieving the state of transcendence beyond dualistic thinking. Most surprisingly, he argues that the widespread belief in reincarnation is not an original Buddhist tenet. Evola presents actual practices of concentration and visualization, and places them in the larger metaphysical context of the Buddhist model of mind and universe. The Doctrine of the Awakening is a provocative study of the teachings of the Buddha by one of Europe's most stimulating thinkers. "There is no more eloquent, interesting or persuasive exposition of what may be called science of philosophy than Sir James Jeans's." - The New York Times Can we have any knowledge of the world outside us other than we gain by the methods of science? Are we humans endowed with free will, or are we mere cogs in a vast machine that must follow its predestined course until it finally runs down? Is the world we perceive the world of ultimate reality, or is it only a curtain veiling a deeper reality beyond? In this strikingly lucid and often poetic book, one of the twentieth century's greatest scientists grapples with these age-old questions, achieving in the process a brilliant and non-technical exposition of the interrelationship between physics and philosophy. He begins by defining physics and philosophy, pointing out the difference in their respective attempts to explain physical reality and man's place in it. This discussion paves the way for an outline of epistemological methods in which the rationalism of thinkers like Descartes, Leibniz, and Kant is compared to the empiricism of Locke and Hume. Over the course of the book, in a manner that is careful and methodic but never dull, Jeans marshals the evidence for his startling conclusion: recent discoveries in astronomy, mathematics, sub-atomic physics, and other disciplines have washed away the scientific basis of many older philosophic discussions. Such long-standing problems as causality, free will and determinism, the nature of space and time, materialism and mentalism must be considered anew in the light of new knowledge and information attained by twentieth-century physical science. Even then, however, Jeans cautions against drawing any positive conclusions, pointing out that both physics and philosophy are both relatively young and that we are still in

Newton's words, like children playing with pebbles on the sea-shore, while the great ocean of truth rolls, unexplored, beyond our reach. Although first published in 1943, nothing in physics has happened to affect Jeans's account in this book; it remains remarkably fresh and undated, a classic exposition of the philosophical implications of scientific knowledge. Discover the most fascinating and in-depth meanings behind the symbols used by the Masons, occultists, witches, New Agers, Satanists, and others. This book uncovers the hidden meanings behind the symbols that we see around us every day. In this well-documented book you will see hundreds of illustrations along with their explanations. You will find many organizational logos, hand signals, tarot cards, zodiac signs, talismans, amulets, and humanist symbols, as well as the meaning of the peace symbol, hexagram, pentagram, yin/yang, circle, all-seeing eye, caduceus, oroborus, ankh, triskele, and the triangle. Also revealed in this book are numerous Masonic and Eastern Star symbols such as the clasped hands, point within a circle, broken column, gavel, obelisk, pomegranate, and the cornucopia. Jeremiah 10:2-3 warns: "Learn not the way of the heathen, and be not dismayed at the signs of heaven;...for the customs of the people are vain." This Is A New Release Of The Original 1922 Edition. "While it is common practice in contemporary theatre to re-contextualize a piece of work, the riskier--and Slavoj Zizek would argue more faithful--approach might be to change the actual story itself. Zizek's *Antigone* not only repositions *Antigone* as a revolutionary political figure, it alters the narrative of the play itself. As Zizek puts it himself in the introduction to the play, 'Only one thing is sure: sticking to the traditional letter is the safest way to betray the spirit of the classic'. Philosophers have long been preoccupied with *Antigone*--Kierkegaard, Hegel, Plato and Judith Butler to name but a few--but never before has a philosopher had the audacity to throw fidelity to the wind and re-write one of the most classic plays in the history of theatre. This lack of fidelity is, of course, precisely the point: not only is this a fascinating new play in its own right, it is a political work calling into question our ideas of reverence to the canon, fidelity to the text and the notion of what 'faithfulness' might really

mean. A brilliantly funny, moving and political play for those who are interested in reading and watching *Antigone* in a new way. This selection of writings from early church leaders includes work by Clement of Rome, Ignatius, Polycarp, Irenaeus, Athenagoras, and Justin Martyr. Long recognized for the quality of its translations, introductions, explanatory notes, and indexes, the Library of Christian Classics provides scholars and students with modern English translations of some of the most significant Christian theological texts in history. Through these works--each written prior to the end of the sixteenth century--contemporary readers are able to engage the ideas that have shaped Christian theology and the church through the centuries. Against a background of oppression and exile, the debate between death and writing continues unabated in *The Lute and the Scars*: death as allegory or symbolic act, and writing as the one impregnable defense, the only means of survival. The captivating million copy bestseller of three young women in search of freedom and love in 1920s India. *India 1928*. A land of heat, dust and dreams, and the promise of love ... Three young women are on their way to India, each with a new life in mind. Rose, a beautiful but naïve bride-to-be, is anxious about leaving her family and marrying a man she hardly knows. Victoria, her bridesmaid couldn't be happier to get away from her overbearing mother, and is determined to find herself a husband. And Viva, their inexperienced chaperone, is in search of the

India of her childhood, ghosts from the past and freedom. Each of them has their own reason for leaving their homeland but the hopes and secrets they carry can do little to prepare them for what lies ahead in India. From the parties of the wealthy Bombay socialites, to the ragged orphans on Tamarind Street, *EAST OF THE SUN* is an utterly engaging novel that will captivate readers everywhere. Praise for Julia Gregson: 'A rich historical novel' Sunday Times 'I adored this wonderful story. From the moment I began reading I truly felt as if I was there. Astonishingly good' Dinah Jefferies, author of *The Tea Planter's Wife* 'Lively, atmospheric novel' Sunday Telegraph 'Exotic, decadent, dangerous and terrific storytelling' Woman & Home 'What a gorgeous read. The Illuminati 666 By William J. Sutton This handy resource describes and illustrates the concepts underlying the "First Principles of Instruction" and illustrates First Principles and their application in a wide variety of instructional products. The book introduces the e3 Course Critique Checklist that can be used to evaluate existing instructional product. It also provides directions for applying this checklist and illustrates its use for a variety of different kinds of courses. The Author has also developed a Pebble-in-the-Pond instructional design model with an accompanying e3 ID Checklist. This checklist enables instructional designers to design and develop instructional products that more adequately implement First Principles of Instruction. Under the Autumn Star

Knut Hamsun In *Under the Autumn Star*, Nobel prize-winning author Knut Hamsun writes a novel magically permeated with the air and light of fall. The narrator, Knut Pedersen (Hamsun's real name) first joins forces with Grindhusen, a man blessed with the faith that "something will turn up," and later with Lars Falkenberg, whose dubious talents include the tuning of pianos. Knut and Lars fetch up as workmen on the estate of Captain Falkenberg (no relation to Lars), with whose wife each falls or fancies himself in love - though this does not prevent either from doing "night duties" in other quarters. In time, Knut is laid off and, in futile pursuit of the woman with whom he is by now helplessly infatuated, finds himself sucked back into the city life he had

fled. We are delighted to publish this classic book as part of our extensive Classic Library collection. Many of the books in our collection have been out of print for decades, and therefore have not been accessible to the general public. The aim of our publishing program is to facilitate rapid access to this vast reservoir of literature, and our view is that this is a significant literary work, which deserves to be brought back into print after many decades. The contents of the vast majority of titles in the Classic Library have been scanned from the original works. To ensure a high quality product, each title has been meticulously hand curated by our staff. Our philosophy has been guided by a desire to provide the reader with a book that is as close as possible to ownership of the original work. We hope that you will enjoy this wonderful classic work, and that for you it becomes an enriching experience. Stunning color photographs highlight this study of the history, science, mining, and cutting of gemstones "THIS BOOK is an attempt to fill the present striking need for an introduction to contemporary linguistic philosophy as it bears on theological discourse. Wherever I have gone, recently, among educated Christians in Britain and America, I have encountered profound curiosity—and a good deal of anxiety—concerning modern methods in philosophy as they relate to the logical nature and validity of theological affirmations. Similarly I have found many of my students in contemporary philosophy and in the philosophy of religion becoming deeply absorbed in the issues raised by a critical examination of theological speech. From both groups, the intellectually alert Christians and the thoughtful graduate and undergraduate students of philosophy and religion, I have been heavily bombarded with appeals for direction to some book which would (1) set forth the central issues and arguments concerning theological discourse for readers who have familiarity with traditional philosophy but who are relatively untrained in contemporary philosophical practices and (2) place into perspective the present state of philosophical and theological discussion in this area of burgeoning interest. To my frustration, I have had to answer such requests with the admission that no such book exists and with the promise that I would try, some day, to provide that book myself. In preparing this volume,

therefore, I have done my best to keep those promises in mind.” Two Yugoslav boys visiting Paris become involved with the theft of the Mona Lisa. The authors set forth the theory and rationale behind adopting a Guided Inquiry approach to PreK-12 education, as well as the expertise, roles and responsibilities of each member of the instructional team. After nine years investigating the exact location of the ultimate religious icon, the Ark of the Covenant, British researcher and investigative journalist Graham Hancock reveals his status-quo shattering discoveries. Part mystery thriller, part true adventure and part travel book, this gripping piece of historical research challenges society's principal religious preconceptions and takes the reader on a rollercoaster ride through ancient history. The Aquarian Gospel of Jesus the Christ is a book by Levi H. Dowling who claimed that he had transcribed the text of the book from the kashic records, a purported compendium of mystical knowledge supposedly encoded in a non-physical plane of existence. In the later 20th century, it was adopted by New Age spiritual groups. The title is derived from the practice in astrology of naming time periods in terms of constellations and their dominant positions in the sky, according to the earth's axial precession. In that system, the Age of Aquarius is approaching.

Learning is the soul of our species. From our first steps to our last words, we are what we learn. But for all its obvious importance, learning has lost touch with human progress. We live in an information age, work in a knowledge economy, yet our schools are relics of an industrial era. Education insider Alex Beard takes us on a dazzling tour of the future of learning to show how we can - and why we must - do better. Tackling everything from artificial intelligence to our growing understanding of the infant brain, Natural Born Learners is a user's guide to transforming learning in the twenty-first century and roadmap to accessing our better future selves. Today's learners communicate, create, and share information using a range of information technologies such as social media, blogs, microblogs, wikis, mobile devices and apps, virtual worlds, and MOOCs. In Metaliteracy, respected information literacy experts Mackey and Jacobson present a comprehensive structure for information literacy theory that builds on decades of practice while recognizing the knowledge required for an expansive and interactive information environment. The concept of metaliteracy expands the scope of traditional information skills (determine, access, locate, understand, produce, and use information) to include the collaborative production and sharing of information in participatory digital environments (collaborate, produce, and share) prevalent in today's world. Combining theory and case studies, the authors Show why media literacy, visual literacy, digital literacy, and a host of other specific literacies are critical for informed citizens in the twenty-first century Offer a framework for engaging in today's information environments as active, selfreflective, and critical contributors to these collaborative spaces Connect

metaliteracy to such topics as metadata, the Semantic Web, metacognition, open education, distance learning, and digital storytelling. This cutting-edge approach to information literacy will help your students grasp an understanding of the critical thinking and reflection required to engage in technology spaces as savvy producers, collaborators, and sharers. "The meaning and worth of love as a feeling is that it really forces us, with all our being, to acknowledge for another the same absolute significance that, because of the power of egoism, we are conscious of only in our own selves. Love is important, not only as one of our feelings but as the transfer of all our interest in life from ourselves to another, as the shifting of the very center of our lives....

"The meaning of human love, speaking generally, is the justification and salvation of individuality through the sacrifice of egoism. On this general basis we can also ... explain the meaning of sexual love" (Vladimir Solovyov) What is the meaning of love's intense emotion? Solovyov points to the spark of divinity that we see in another human being and shows how this "living ideal of Divine love, antecedent to our love, contains in itself the secret of the idealization of our love." According to Solovyov, love between men and women has a key role to play in the mystical transfiguration of the world. Love, which allows one person to find unconditional completion in another, becomes an evolutionary strategy for overcoming cosmic disintegration. R. Swinburne Clymer (1878-1966) was an American Rosicrucian. He reached the rank of Grand Master in

1905 and became the Supreme Grand Master of Fraternitas Rosae Crucis in 1922, serving as such until his death. The Mysteries of Osiris describes itself as "Setting forth the symbolism, mythology, legends and parables beginning with the outer religious systems of the Egyptians, primarily based on The Drama of the Heavens; together with the Inner or Esoteric Interpretations as taught in the lesser and greater mysteries throughout the ages, including the present. A guide to Girl Scout badges, what they mean and the requirements to earn them. A comprehensive, visual reference, enhanced by two thousand photographs and illustrations, provides information on all major fields of knowledge and includes timelines, sidebars, cross-references, and other useful features. Hapgood's tour de force is back in print! This riveting account of how earth's poles have flipped positions many times is the culmination of Hapgood's extensive research of Antarctica, ancient maps and the geological record. This amazing book discusses the various pole shifts in earth's history -- occurring when earth's crust slips in the inner core -- and gives evidence for each one. It also predicts future pole shifts: a planetary alignment will cause the next one on 5 May 2000! Packed with illustrations, this book is the reference other books on the subject cite over and over again. With millennium madness in full swing, this is just the book to generate even more excitement at the unknown possibilities.
