A Directory of Selected Older Maritimes Plantations Nov 27

2019 Plantation forestry is a major component of the intensive forestmanagement programs of Nova Scotia and New Brunswick. Plantation yields of 210 cubic m/ha are now required of all licensees in New Brunswick. A directory is presented of selected successful older plantations in the Maritimes that are nearing or have exceeded the 40-year rotation age prescribed in provincial guidelines. This will provide forest managers with a reference for measuring the success of recent reforestation operations.

Pearly Flats Jul 28 2022 Pearly Flats, Hidden among the great novels of our time comes an epic tale of good versus evil. Charles Fetters'..... Pearly Flats is the first of a 3 volume set. This adventure pits the Organization, Pearly Flats International, against the greed that suffocates the life of all common people. This novel takes the reader inside the Organization itself, from it's infancy in a small office in Canada to it's Super Power status.... on the World stage. It gives one the experience of joining the front row seat to the day to day struggles, fear, and anxiety of the largest rebellion in World history. In the beginning the World Powers brush the Organization aside as an other terrorist group. When Pearly Flats flexes it's muscles it leaves them dazed and confused. However..... the powers to be soon regroup and the Organization discovers the makings of World War 3. Out gunned several times over Pearly Flats has only one advantage, the element of surprise. Pearly Flats
