Collins International Primary English is a six-level, multi-component course for the international market which has been carefully developed to meet the needs of teachers and students. Collins is working with Cambridge International Examinations towards endorsement of these titles. Collins International Primary English is a self-contained, cohesive course which develops reading, writing, speaking and listening skills at primary level. Consisting of students' books, workbooks, teachers' guides and a digital resource, it includes a wide range of stimulating and engaging texts to build literacy and language skills. With a colourful and engaging design, the Student's Books follow a clear structure and progression through the levels. They feature carefully selected texts, covering both fiction and non-fiction genres, including extracts from the highly successful Collins Big Cat series. Skills are clearly defined and different levels of ability are catered for within each unit. Also in the series: the Student's Books are supported by online resources, workbooks, and comprehensive teacher support. This volume addresses theories and practices surrounding the entitled, self-absorbed students called Millennials. Stereotypical Millennials are often addicted to gadgets, demand

service more than education, and hold narrow perspectives about themselves and those around them; when seen through this lens, Millennial students can understandably frustrate the most dedicated of professors. The contributors show how new and better educational outcomes can emerge if professors reconsider Millennials. First and foremost, many of these students simply don't fit their stereotype. Beyond that, the authors urge faculty to question commonly held assumptions, showing them how to reevaluate their pedagogical practices, relationships with students, and the norms of college classrooms. Contributors focus on practical means to achieve new and more evocative outcomes by treating Millennial students as serious collaborators in the learning process, thereby helping those students to more closely identify with their own education. The assignments that professors give, the treatment of topics that they broach, and the digital tools that they ask students to employ can shift students' concerns away from a narrow focus on impersonal, technical mastery of content and toward seeing themselves as Millennial thinkers who fuse their lives with their learning. This is the 135th volume of this Jossey-Bass higher education series. New Directions for Teaching and Learning offers a comprehensive range of ideas and techniques for improving college teaching based on the experience of seasoned instructors and the latest findings of educational and psychological researchers. Ensure top marks and complete coverage with Collins' brand new IGCSE Maths course for the Cambridge International Examinations syllabus 0580. Provide rigour with thousands of tried and tested

This textbook has been designed to meet the needs of B.Sc. (Hons.) Fourth Semester students of Zoology as per the UGC Choice Based Credit System (CBCS). Comprehensively written, it explains the essential principles, processes and methodology of Comparative Anatomy of Vertebrates, Animal Physiology: Life Sustaining Systems and Biochemistry of Metabolic Processes. This textbook is profusely illustrated with over 550 well-labelled diagrams, not only to supplement the descriptions, but also for sound understanding of the concepts. College students are subject to a massive input of stresses which require successful and ever-changing coping strategies. These stresses include inside and outside pressures by the world to succeed, financial worries, concerns about uncertain futures, social problems and opportunities since college is often the meeting place for future mates, and homework and tests in multiple and complex subjects requiring preparation and focus with often conflicting priorities. Unsuccessful coping often results in anxiety, heavy drinking, depression and a host of

other mental health problems. This new book presents new and important research in this important field.

Forget the textbooks, this is the only book you'll ever need to get through your first year! A classic is back. "The Mother Tongue Book II" was first published over one hundred years ago, but the vintage grammar text from George Kittredge and Sarah Arnold has a faithful following, even today. The original text is all here, but with a fresh look designed to bring this classic to a new generation

of students. New features will aid students in their study of intermediate and advanced grammar concepts. Margin boxes emphasize key points. Notes from the editors explain outmoded terms to modern students. With nearly 400 pages packed with instruction and practice, "The Mother Tongue, Adapted for Modern Students" is suited for classroom, homeschool, or self-study settings. It is also an excellent grammar reference book.

The world of yoga has exploded since the first edition of *Instructing Hatha Yoga* was published in 2006. Millions more enthusiasts worldwide are experiencing the physical benefits and mindful awareness of yoga in gyms and spas, the training rooms of professional sport teams, prisons and hospitals, and even classrooms. With the increasing demand for qualified yoga teachers who can meet the needs of a diverse group of students, this updated edition of *Instructing Hatha Yoga* could not have come at a better time. Featuring detailed instructions on teaching 68 yoga poses and more than 200 photos showing the postures, the text covers all aspects of safe and confident hatha yoga instruction. The second edition is enhanced with the following features:

- Updated verbal and visual cues to use in teaching each posture
- Sample children's and prenatal classes
- 75 new video clips that demonstrate yoga poses and modifications and instruct on physically assisting and adjusting students
- New online teacher resource with self-inquiry questionnaire, class evaluation, chapter review questions, and other printable instructional resources

Master teacher and author Diane Ambrosini retains her original emphasis on simple cues for bringing students into proper alignment and deeper

mental focus and detailed instructions for making safe and effective hands-on modifications and adjustments of yoga poses. The book highlights issues of importance to even the most experienced instructors, including creating a safe and comfortable learning environment, structuring a class, teaching pranayama (breath work), and handling personal integrity and ethics. Developed in line with the New Yoga Alliance Standards and the Yoga Teachers' Registry requirements, *Instructing Hatha Yoga* is a comprehensive and user-friendly guide to becoming a confident and qualified yoga instructor. Students and teachers not only will learn how to teach yoga poses, but they will also know how to direct students toward deeper self-awareness to positively affect their lives for years to come.

This book will help you to demonstrate your communication skills and develop your proficiency in nursing and health care. *Essentials* is a series of accessible,

introductory textbooks for students in nursing, health and social care. New and forthcoming titles in the series: The Care Process Communication Skills Leadership Mental Health Promoting Health and Wellbeing Study Skills Academic Writing for International Students of Science will help international students to develop their command of academic scientific writing in English. It guides students through the writing process itself, and will help them to produce clear, well-written and well-organised essays and reports. The book covers a range of issues such as how to explain complex ideas clearly and concisely, how to develop a coherent argument, and how to avoid plagiarism by making effective reference to sources. Through detailed analysis of authentic scientific texts, the book will enhance students' understanding of the nature of academic scientific writing. This will enable them to understand how language and discourse function in a real scientific context. The texts serve as models of good writing and are followed by practice activities which will help students to develop their own writing skills. Key topics include: the writing process; academic scientific style; sentence structure; paragraph development; referring to sources; coherence, argument and critical thinking; academic and scientific conventions. This book will be an invaluable companion to those studying for a science or technology degree in an English-speaking institution. Informative study boxes, model answers and a clear, comprehensive answer key mean that the book can be used for self-study or with guidance in the classroom. Including new material, activities

and tasks to make lessons more enjoyable, the new edition of this text continues to provide a learner, training and assessment programme for students to monitor their progress and become more efficient learners. Banish math anxiety and give students of all ages a clear roadmap to success Mathematical Mindsets provides practical strategies and activities to help teachers and parents show all children, even those who are convinced that they are bad at math, that they can enjoy and succeed in math. Jo Boaler—Stanford researcher, professor of math education, and expert on math learning—has studied why students don't like math and often fail in math classes. She's followed thousands of students through middle and high schools to study how they learn and to find the most effective ways to unleash the math potential in all students. There is a clear gap between what research has shown to work in teaching math and what happens in schools and at home. This book bridges that gap by turning research findings into practical activities and advice. Boaler translates Carol Dweck's concept of 'mindset' into math teaching and parenting strategies, showing how students can go from self-doubt to strong self-confidence, which is so important to math learning. Boaler reveals the steps that must be taken by schools and parents to improve math education for all. Mathematical Mindsets: Explains how the brain processes mathematics learning Reveals how to turn mistakes and struggles into valuable learning experiences Provides examples of rich mathematical activities to replace rote learning Explains ways to give students a positive math mindset Gives examples of how assessment and

grading policies need to change to support real understanding. Scores of students hate and fear math, so they end up leaving school without an understanding of basic mathematical concepts. Their evasion and departure hinders math-related pathways and STEM career opportunities. Research has shown very clear methods to change this phenomena, but the information has been confined to research journals—until now. *Mathematical Mindsets* provides a proven, practical roadmap to mathematics success for any student at any age. This is a book for tutors, lecturers and teachers in further and higher education, who need to teach their students how to study, learn and communicate effectively. Based around the same techniques and contents as the tutors earlier book *Essential Study Skills* (SAGE 2003) which is itself based on many years experience of teaching and mentoring students in higher education, this book is intended to work with traditional and non-traditional students. The material will be suitable for institutions concerned with widening participation; with student retention; with quality enhancement; with equal opportunities and with professional /staff development. *face2face* Second edition is the flexible, easy-to-teach, 6-level course (A1 to C1) for busy teachers who want to get their adult and young adult learners to communicate with confidence. The *face2face* Second edition Online Workbooks provide the course workbook content plus additional collaborative tools in a package that supports independent study and teacher-managed self-study. As part of a virtual learning world, the online workbooks allow students to collaborate and communicate, and enable teachers to

track work and progress. They offer a classroom without walls for schools that wish to take their teaching into the digital age. This pack contains the Student's Book with DVD-ROM and access to the Online Workbook. International Negotiations is an exciting new short course (15-20 hours) for Business English learners who want to excel at negotiating. Drawing on inspirational advice from leading experts in negotiation, International Negotiations takes students through the entire negotiation process, from preparing to negotiate to closing the deal. The ten modules give learners the essential language, skills and techniques needed for successful negotiations and cover topics such as relationship-building, questioning techniques, decoding body language, bargaining and the powers of persuasion. Challenging role-plays and skill-building games further develop key negotiation and language skills, while the Key and Commentary provide valuable insights into all aspects of negotiating, including the importance of understanding cultural differences when negotiating. Chris Davies is acknowledged to be Britain's foremost graduate coach. He founded his company, Graduate Coach, seven years ago and, since then, has kick-started the careers of over 300 graduates. As a result, Amazon, Aviva, Bloomberg, Coca-Cola, Deloitte, Facebook, Goldman Sachs, Google, JP Morgan Lloyds Bank and many other blue chip companies count Chris's alumni among their employees. So, too, do organisations such as Network Rail and the NHS. Before Graduate Coach, Chris pursued two other careers, in magazine publishing and advertising and marketing. In both cases, Chris built successful enterprises from scratch. Explains

the basic terminology and concepts of English grammar, focusing on material which will most benefit students of Japanese. The Law Student's Dictionary is an invaluable reference work for all law students. The terms have been chosen with the specific needs of the undergraduate student in mind, providing a full insight into legal terminology and ensuring students are familiar with terms they will encounter during their studies. The dictionary includes substantial entries on core student topics which outline the conceptual importance of key areas, to give students an idea of how these terms have been shaped by, and in turn shape, how lawyers think. Some older terms are also included - although they are not used to frame the current law, students will come across these words of historical significance in the course of their studies. The text features cross-referencing of terms and definitions, giving students the opportunity to expand and contextualize their knowledge, and the material is presented in a new two-color page design, which allows for quick and easy navigation. Are your students excited about writing? Do you want them to be? Do you want them to ask for more writing opportunities and assignments? Do you want them to engage in writing tasks more quickly and with more fluency? The traditional five-step writing process never explicitly teaches students to be fluent in their writing—to be able to write quickly on any topic. Extreme Writing targets precisely that with focused, daily writing sessions that provide students with consistent, long-term engagement. It is designed to appeal to students in grades 4–8, and—best of all—the approach involves

little extra work for you. In *The Power of Extreme Writing*, author Diana Cruchley not only outlines the process but also describes what it looks like in the classroom, explains how to assess student work, and highlights more than a dozen unique inspirations that motivate students to write. *Extreme Writing: it's fun, it's fast, and it works.* Forging closer links between university research and teaching has become an important way to enhance the quality of higher education across the world. As student engagement takes centre stage in academic life, how can academics and university leaders engage with their students to connect research and teaching more effectively? In this highly accessible book, the contributors show how students and academics can work in partnership to shape research-based education. Featuring student perspectives, it offers academics and university leaders practical suggestions and inspiring ideas on higher education pedagogy, including principles of working with students as partners in higher education, connecting students with real-world outputs, transcending disciplinary boundaries in student research activities, connecting students with the workplace, and innovative assessment and teaching practices. Written and edited in full collaboration with students and leading educator-researchers from a wide spectrum of academic disciplines, this book poses fundamental questions about learning and learning communities in contemporary higher education. In the spring of 1865, with Japan in the grip of internal conflict, eighteen samurai and an interpreter risked their lives to embark secretly on a voyage to the unknown lands of the barbarian West.

Their destination was Britain - an island at the hub of a vast empire. These were the students from the province of Satsuma in southern Japan, some of them still in the teens, all carrying orders from their domain to travel abroad. The students' experience of life in the West not only transformed their perception of the outside world, but through their diverse activities in later life, had a profound impact on commerce, education and culture in Meiji Japan. First published in 1974, Inuzuka Takaaki's original study is still the classic work on the Satsuma students' revealing tale of discovery. In this translation and adaptation by Andrew Cobbing, further details that have since emerged have been incorporated into the text or added as supplementary references to give a fresh portrayal, the first in English, of this singular episode in the opening of Japan. Easy and enjoyable to teach, Touchstone is packed with new and exciting ideas, offering a fresh approach to the teaching and learning of English. Annotation.
